I am a proficient graduate in Electrical, Electronics, and Power Engineering, with a strong focus on electronics circuits, sensors, actuators, and PCB design. I am skilled in using software such as KiCad, Proteus, MATLAB, and Arduino IDE. With two years of hands-on experience in a college robotics team, I have developed both my technical skills and practical knowledge, preparing me for a challenging role in R&D. I am eager to contribute to innovative projects, leveraging my academic background and practical experience.

Education Background

- Government College of Engineering, Chhatrapati SambhajiNagar.
B.Tech (Electrical, Electronic & PowerEngineering) (2021- 2025)
- Arts, Commerce, and Science College, Chandrapur (2019- 2021) HSC - 89%
- Lokmanya Tilak Vidyalaya Chandrapur (2014-2019) SSC - 71.80%

Professional Experience

BKT Tyres Pvt. Ltd. | Jul 2025 – Feb 2026

Graduate Engineer Trainee (GET) – Automation

- Worked on PLC-based industrial automation, troubleshooting, and maintenance.
- Assisted in commissioning and maintenance of automation systems.

Projects

Team Cybrotics (Core Team Member)

- Led electronics execution and technical documentation.
- Managed procurement of electronic components.
- Coordinated subsystem integration.
- Supported robot development for national competitions.

DD ROBOCON 2023-2024

- Responsible for Team Management & Documentation for Team at College.
- Achieved AIR 5, Design and Development of Stage-1 Documentation.
- Achieved Top 8 ranking at Quarterfinal.
- Runner up in MathWorks Modeling Award at DD-ROBOCON 2024.
- Recipient of Robotics Society Award for leadership & innovation in robotics.
- Procured and managed electronic components for competition projects.
- Worked as Electronics Engineer to Enhance Robot 1 (Semi-Automatic Robot).

TECHNOXIAN 2022-2023

- Electronics Operations Manager – Competitive Robotics
- Working on a Competition called TECHNOXIAN
- Achieved Top 10 ranking at TechnoXian.
- Developed robots optimized for RoboSoccer, Maze Solver, and Fast Line Follower.

Real-Time Inventory Management System using Machine Learning & IoT

- Designed and implemented an IoT-based embedded system for real-time inventory monitoring.
- Applied Machine Learning for demand forecasting, automated stock tracking, and inventory optimization.

Courses Completion

- Professional Training: CDAC – Embedded Systems Design
- Embedded C, ARM Cortex-M3/M4, Embedded Linux, Linux Device Drivers, RTOS, IoT, and Data Structures & Algorithms.

Extra Curricular

Represented Institute at national robotics competitions, including

- TechnoXian 2023
- DD Robocon 2024

showcasing skills in robotics and team collaboration.

Technical Skill :- PCB Design and manufacturing, Arduino programming, MS office, Canva, PID Controller System, Team Management, Real-time problem-solving skills.

Soft Skill :- Leadership, Work ethic, Observation, Decision making, Communication, Multi-tasking, Team Spirit,

Software :- Ki-CAD, EasyEDA, MATLAB, proteus, DipTraces, Arduino IDE,

Programming Language C- Language
